When you perform a rolling upgrade in your IBM Spectrum Symphony 7.1.2 and IBM Spectrum Conductor with Spark 2.2 cluster to upgrade IBM Spectrum Conductor with Spark from 2.2 to 2.2.1, some older packages are retained in your upgraded cluster for rollback purposes. After the upgrade, once you test and confirm that the upgraded cluster is functional, these packages are no longer required. To avoid maintenance overhead, use the information in this document to manually remove these files in your cluster.
