

IBM Aspera

FASPEX 4.4.0 PATCH Level 1

Operating Systems: Linux

Date: 01/16/2020

This patch includes all fixes provided in previous patches for Faspex 4.4.0.

This patch fixes the following issues:

FASPX-1620	Update http gateway SDK (2.1.0+ compatibility) in Faspex
FASPX-1629	Internal Server Error when listing packages including a symlink to a directory

PATCH INSTRUCTIONS

How to apply this patch (Linux):

1. Download the patch file (IBM_Aspira_Faspex_4.4.0_Linux_Patch_Level_1.zip) and unzip it
2. Make sure to back-up all the files in `/opt/aspera/faspex/`
3. Run the following command to replace existing files with patch files:

```
/bin/cp -r patch_path/  
IBM_Aspira_Faspex_4.4.0_Linux_Patch_Level_1/* /opt/aspera/faspex/
```

4. Restart Faspex service:

```
asctl faspex:restart
```

NOTE: After application of this patch, Faspex must be configured to use an HTTP gateway running 2.1.0 or later in order to use the related features. However both HTTP gateway version 2.0.0 and 2.1.0 can be used with Faspex 4.4.0 without patch level 1.
