## Product and Version Related to these fixes

### *Product and Version*

Version 5.2.0.11 relates to Sterling Connect:Express Adapter for Sterling B2B Integrator Version 5.2.

### *Pre-requisites*

This Fixes must be installed in Sterling B2B Integrator Version 5.2 or newer environment.

### *Previous Fixes Superseded*

This version supersedes all previous version.

---

## Fixed Cases Included in 5.2.0.11

### *Updated components*

---

| <b>Functionality</b>     | <b>Description</b>   |
|--------------------------|--|
| Jars                     | cxcmd.jar includes its own version of CXJAI and is an executable jar.  |
| Services                 | cxcmd and CXJAI are now embedded in cxservices.jar and are no longer deployed separately.  |
| CXSession                | cxcmd jar is now embedded in CXsession WEB-INF/lib and also includes its own CXJAI jar   |
| CXSession                | Versions displayed now also include CXSession version. CXSession version and cxcmd and CXJAI version can differ. (5.2.0.x and 1.4.0.x) |
| CXSession (APAR IT35186) | JSP pages are not correctly encoded and Jetty server fails on some pages. Pages are now UTF-8 encoded.                                 |

---

---

## Fixed Cases Also Included

### *Updated components*

The following table lists the updated components.

| Functionality                                  | Description  |
|--|--|
| Jars   | cxjai update to 1.4.0.10<br>cxcmd update to 1.4.0.10   |
| CXTransferSubmit,<br>CXEerpSubmit services     | PartnerType (TYPP) added to the parameter list for a transfer request. It is now possible to override the type of partner value defined in the partner definition. This is only valid with a Connect:Express server running on a Linux/Unix platform and with version greater or equal to 1.5.0.16.  |
| CXTransferSubmitAdapter<br>CXEerpSubmitAdapter | Services definition have been updated to include this new parameter.   |
| CXTransfertSubmit                              | Bad interpretation of CX Windows transfer status when waiting for transfer end.  |
| CxServer                                       | APAR IT20010 – On mode=create, when a component already exists, component creation should be rejected.<br><br>APAR IT20011 – Banner returned by CX Unix or Windows API server can be interpreted as a FTP banner. New returned banner is now in an internal format. Compatibility with previous format..   |
| CXTransfertStatus                              | This service failed when request number is an hexadecimal value.   |
| CxPartner                                      | PresentationTableId field added for Unix and Windows<br>Value 'A' = PeSIT ANY of Protocol field added for Unix and Windows<br>Tcp/ip Hostname length extended from 32 to 128 characters for Unix servers.  |
| CxFile   | InquiryOptionUsed field added for Unix and Windows<br>PresentationTableId no longer required.<br>LocalPhysicalName length extended from 44 to 128 characters for Unix servers.   |
| CxSession                                      | BaseWindowSize added for OSType = Windows<br>InputIdentification and OutputIdentification fields added for Windows   |
| CxTransferSubmit                               | CxTransferSubmit fails because the status of the transfer is changed to 'X' after reception of an EERP. Only status 'E' was checked.   |
| CxSession                                      | Java exceptions in the Journal screen, in the Activity screen, and in the transfer submit screen for Unix.<br><br>Invalid notification options. Old and new notification systems are disconnected.<br><br>physical name field in the transfer request screen, OS=Windows. The physical file name can be provided from the text field or the browse field. The browse field has |

priority.

Cxcmd, CXJAI, and CxSession

extended character sets in symbolic names and passwords.

# Installing Sterling Connect:Express Adapter 5.2.0.10 for Sterling B2B Integrator

Sterling Connect:Express Adapter for Sterling B2B Integrator is shipped in a zip file for Microsoft Windows CXSI\_WIN\_5.2.0.10.zip or a tar file for UNIX CXSI\_UNIX\_5.2.0.10.tar. When the installation is complete, Sterling Connect:Express services are shown in the Service Configuration screen of SI interface (Dashboard) and in the modeler (GPM).

---

## Installing the Services on UNIX

Logon to the SI user account and do the following (we suppose that the SI installation directory is <installdir>):

1. Change directory to <installdir>/bin of SI, and stop SI if it is running.

- In a test environment:

---

```
# ./hardstop.sh
```

---

- In a production environment:

---

```
# ./softstop.sh
```

---

2. Copy CXSI\_UNIX\_5.2.0.10.tar in a temporary directory.
3. Extract the archive.

---

```
# tar xvf CXSI_UNIX_5.2.0.10.tar
```

---

4. The following files are extracted:

- cxServices.jar

- cxlogger.txt
- installer.jar
- install.sh

---

**IMPORTANT:** VERIFY THAT THE STERLING B2B INTEGRATOR DATABASE SERVER IS STARTED BEFORE BEGINNING TO INSTALL THE SERVICES. (If the database server of SI is installed as a Microsoft Windows service, verify that this Microsoft Windows service is started).

---

5. Install the services (The command interpreter must be sh):

---

```
# ./install.sh
```

---

6. Restart SI.

---

```
# cd <installdir>/bin  
  
# ./run.sh
```

---

---

## Installing the Services on Microsoft Windows

1. Open a DOS command prompt and change to directory <installdir>/bin of SI, and stop SI if it is running.

- In a test environment:

---

```
# ./hardstop.sh
```

---

- In a production environment:

---

```
# ./softstop.sh
```

---

2. Copy CXSI\_WIN\_5.2.0.10.zip in a temporary directory.

3. Extract the archive using unzip utility

4. The following files are extracted:

- cxServices.jar
- cxlogger.txt
- installer.jar
- install.cmd

---

**IMPORTANT:** VERIFY THAT THE STERLING B2B INTEGRATOR DATABASE SERVER IS STARTED BEFORE BEGINNING TO INSTALL THE SERVICES. (If the database server of SI is installed as a Microsoft Windows service, verify that this Microsoft Windows service is started).

---

5. Install the services:

---

```
# ./install.cmd
```

---

6. Restart SI.

---

```
# cd <installdir>/bin
```

```
# ./run.cmd
```

---

---

# Installing Sterling Connect:Express Browser Interface

The Sterling Connect:Express Browser interface (CXIHM) is shipped in a zip file CXSI\_IHM\_5.2.0.10.zip. This file provides the Sterling B2B Integrator (CXSI\_IHM\_5.2.0.10.zip) and the standard version (CXSession5.2.0.10.zip) of the CXSession application.

---

## Installing the Browser Interface in Sterling B2B Integrator

1. Stop SI if it is running.
2. Unzip CXSI\_SESSION\_5.2.0.10.zip file
3. Copy the CXSession.war and CX\_IHM\_Export.xml files to <installdir>/bin/noapp/deploy of SI.
4. Restart SI.

---

## Installing the Browser Interface in Apache Tomcat or Jetty

1. Stop Apache Tomcat or Jetty server if it is running.
2. Unzip CXSESSION\_5.2.0.10.zip file
3. Copy CXSession.war file to <installdir>/webapps of Apache tomcat or Jetty server.
4. Restart the server.
5. Browse <http://localhost/CXSession>

This information was developed for products and services offered in the U.S.A.

IBM may not offer the products, services, or features discussed in this document in other countries. Consult your local IBM representative for information on the products and services currently available in your area. Any reference to an IBM product, program, or service is not intended to state or imply that only that IBM product, program, or service may be used. Any functionally equivalent product, program, or service that does not infringe any IBM intellectual property right may be used instead. However, it is the user's responsibility to evaluate and verify the operation of any non-IBM product, program, or service.

IBM may have patents or pending patent applications covering subject matter described in this document. The furnishing of this document does not grant you any license to these patents. You can send license inquiries, in writing, to:
