Supplemental Upgrade Instructions for Gentran:Plus for z/OS 6.6.0.1

*Instructions to be used when you are upgrading from a release prior to 6.6.

Utilize the Gentran:Plus for z/OS 6.6 install guide

http://public.dhe.ibm.com/software/commerce/doc/gentran/basic/66/GzOS66_Gentran_Plus_Installation_Guide.pdf as your primary source for the upgrade and perform each step from the install guide as directed (see exception below):

a. Complete the install installation through Chapter 3, Step 6 Build the Sequential Sterling Gentran:Plus files on your Mainframe.

b. HALT the install guide instructions at Chapter 3, Step 7.

c. Follow instructions listed below starting with **Download 6.6.0.1 fix from Fix Central**

> NOTE: The following instructions will replace the load libraries that were just restored from Step 6 with the new load libraries. The previous load libraries were stored in a PDS format. The 6.6.0.1 point release contain compiled objects using the IBM Enterprise COBOL for z/OS version 6 release 2 compiler and they are stored in a PDSE format

d. Then, continue on with your upgrade/installation with Chapter 3, Step 7(Defining Sterling Gentran:Plus System Files).

Download the 6.6.0.1 fix from Fix Central: http://www-933.ibm.com/support/fixcentral/

Enter Sterling Gentran for z/OS in the Product selector tab

Find product	Select product

Type the product name to access a list of product choices.

Abstract: Fix Pack 6.6.0.1 for Sterling Gentran:Plus for z/OS

Check the box for the 6.6.0.1-SterlingGentran-Plus-zOS-fp6601 and press Continue.

If you aren't already signed in it will prompt you for IBM id and password

A list of items available for download - the cumulative fix itself, along with Fix install instructions, this current document, JCL step A, and JCL step B.

6.6.0.1-SterlingGentran-Plus-zOS-fp6601
The following files implement this fix.
- GPL6601   ←**this is the product fix for Plus**
- FixInstallInstructionsforGentranPlusforzOS6_6_0_1..pdf
- PCG6601A.txt   ←**this is the jcl for this fix part A**
- PCG6601B.txt   ←**this is the jcl for this fix part B**
- UpgradeInstallInstructionsforGentranPlusforzOS6_6_0_1..pdf ←**This is the current document you are viewing**

Change to **Download using browser HTTP option** >Continue and place the files on a drive from which you can ftp the files to your z/OS.

1. FTP in ascii mode the 2 JCL files to your z/OS – PCG6601A.txt and PCG6601B.txt.

2. Edit the PCG6601A JCL member. Read the comments at the beginning of the JCL to replace the appropriate information in the JCL.

3. Run the PCG6601A JCL to create the upload file.

4. Once that has successfully completed, ftp the PCG6601 file in binary mode to the file you just created in JCL member PCG6601A.

5. Edit the PCG6601B JCL. You will want to change the name of these 4 files to match exactly as they were recorded in your JCL member PCGTEPD2 that you modified in step 6

   GENTRAN.V6601.RTE.BATCH.LOAD

    GENTRAN.V6601.RTE.CICS.LOAD

   GENTRAN.V6601.RTE.UTILITY.SOURCE

   GENTRAN.V6601.RTE.README

   Run the PCG6601B jcl and it will replace the 4 files listed above with the 6.6.0.1 cumulative fix.

6. Continue with Chapter 3, Step 7 in your installation Guide. Once you have completed this guide, you will be at point release 6.6.0.1
